DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 7, drawn to an apparatus to detect TWA using one of a periodicity or statistical waveform, classified in class 600, subclass 515.
- II. Claims 8- 14, 20-24, drawn to an apparatus and method to detect TWA using a statistical test, classified in class 600, subclass 515.
- III. Claims 15-19, drawn to a method of detecting TWA using periodic transform, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I compared to II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I can be used to perform a periodic transform with no statistical testing as called for in invention II and has separate utility such as testing for TWA by transforms alone. Invention III on the other hand is a different method requiring a different apparatus as compared to invention II and may or may not require the limitations of the apparatus of claim I in its current alternative language. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark W Bockelman whose telephone number is (703)-308-2112. The examiner can normally be reached on Monday - Friday 9:30-6:00.
